

Valyrian Typography (Episode 107)

I have the first version of the Valyrian font ready. I haven't yet prepared the instructions on how to use it, but I wanted to get you the requested translations as soon as I could. Below is the Valyrian and English:

Ziry kīviō dārilaros issa, se zȳhon suvio perzō vāedar issa.
“He is the prince that was promised, and his is the song of ice and fire.”

And this is what it looks like in the Valyrian script:

⋆·X·V·H·C·F·L·W·J·
M·X·A·W·C·M·C·M·
K·E·O·X·

Here are two replacement suggestions for the dragonkeeper cloak. The first is the symbol for “guardian”, and the second is the symbol for “egg”. The third symbol is the symbol for “dragon”, previously seen:

⦿ A M
