## Romanization and Pronunciation

- This is the romanization system, which will be used to spell the language using the Roman alphabet. The full system is described in detail below:
  - *A, a*: Pronounced like the "<u>a</u>" in "f<u>a</u>ther" when stressed; otherwise pronounced like the "<u>a</u>" in "sof<u>a</u>".
  - *B, b*: Pronounced like the "<u>b</u>" in "<u>b</u>ad".
  - *D*, *d*: Pronounced like the "<u>d</u>" in "<u>d</u>iet".
  - Dh, dh: Pronounced like the " $\underline{th}$ " in " $\underline{th}$ is" (never like the " $\underline{th}$ " in " $\underline{th}$ in", for which see dh).
  - *E, e*: Pronounced like the "e" in "get" in closed syllables; otherwise pronounced like the "a" in "gate".
  - *F, f*: Pronounced like the "<u>f</u>" in "<u>f</u>og".
  - *G*, *g*: Pronounced like the "g" in "goat" (never like the "g" in "genius").
  - *I, i*: Pronounced like the "<u>i</u>" in "mach<u>i</u>ne".
  - K, k: Pronounced like the " $\underline{k}$ " in " $\underline{s}\underline{k}y$ " (this sound features no aspiration. Aspiration is the puff of air that occurs in the " $\underline{k}$ " in " $\underline{k}$ ite". Compare the " $\underline{k}$ " in " $\underline{k}$ ite" and the " $\underline{k}$ " in " $\underline{s}\underline{k}y$ " [try holding your hand in front of your face when pronouncing both]. The k should always be pronounced like the " $\underline{k}$ " in " $\underline{k}$ ite").
  - *L*, *l*: Pronounced like the "<u>l</u>" in "<u>l</u>ove".
  - *M*, *m*: Pronounced like the "<u>m</u>" in "<u>m</u>atter".
  - *N*, *n*: Pronounced like the "<u>n</u>" in "<u>n</u>ever".
  - *O*, *o*: Pronounced like the "<u>aw</u>" in "l<u>aw</u>" in closed syllables; otherwise pronounced like the "o" in "tote".

- *P, p*: Pronounced like the "p" in "spike" (this sound features *no* aspiration. Aspiration is the puff of air that occurs in the "p" in "pike". Compare the "p" in "pike" and the "p" in "spike" [try holding your hand in front of your face when pronouncing both]. The *p* should always be pronounced like the "p" in "spike"; never like the "p" in "pike").
- *R, r*: Pronounced like the "<u>r</u>" in Spanish "pe<u>r</u>o". Nearly identical to the "<u>t</u>" or "<u>d</u>" sound in English "ma<u>t</u>a<u>d</u>or" (pronounced quickly).
- *S*, *s*: Pronounced like the "<u>s</u>" in "<u>s</u>ad".
- *Sh*, *sh*: Pronounced like the "<u>sh</u>" in "<u>sh</u>ade".
- *T, t*: Pronounced like the "te" in "stake" (this sound features *no* aspiration. Aspiration is the puff of air that occurs in the "te" in "take". Compare the "te" in "take" and the "te" in "stake" [try holding your hand in front of your face when pronouncing both]. The *t* should always be pronounced like the "te" in "stake"; never like the "te" in "take").
- *Th, th*: Pronounced like the "th" in "thin" (*never* like the "th" in "this", for which see *dh*).
- *U, u*: Pronounced like the "<u>u</u>" in "r<u>u</u>minate".
- *V, v*: Pronounced like the "<u>v</u>" in "<u>v</u>an".
- *W, w*: Pronounced like the "w" in "walk".
- *Y, y*: Pronounced like the "y" in "yet".
- **Z**, **z**: Pronounced like the "<u>z</u>" n "<u>z</u>ebra".
- **Zh**, **zh**: Pronounced like the "<u>z</u>" n "a<u>z</u>ure".
- ': This is referred to as a glottal stop, and is pronounced just like the catch in one's throat that occurs in between the "uh" and "oh" in English "uh-oh". This isn't a difficult sound to produce; it just requires a bit of practice to insert it into words. It will occur naturally in a string of vowels pronounced separately in English (e.g. if one were to say "A A A A A A A A" [saying the actual name of the letter each time] over and over, a glottal stop will naturally occur before each instance of the

vowel). If one simply stops pronouncing a word mid-vowel and starts again, it will naturally occur. (Note: It is important to remember that this apostrophe is  $\underline{not}$  a stray mark, and  $\underline{not}$  simply there for decoration. The apostrophe stands for a consonant which has the same status as g or k or any other consonant.)
