## **Ryevost signs**

I might add a family name to these shop names if I wanted them to be longer. Can you please tell us how that would work? For example Myetzei's Wine Shop.

A name can be placed directly after the name of a shop with no modification to indicate that it's that person's shop. Additionally, the name may be placed in the partitive. Furthermore, if it's a family shop, it might be in the plural. The name will always come after, but it can be unmodified (singular or plural), or it can be partitive (singular or plural). An example of each is shown below (feel free to use the names or not).
